

Disp&FLOW[®] FOOD

Rapid Test for Food Industry

Disp&FLOW[®]

Rapid tests for the detection of allergens or prohibited components on your production lines

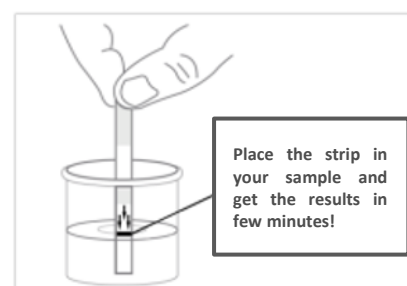

Overview

Our **Disp&FLOW®-Food** product is a rapid immuno-chromatographic test for the qualitative determination of different components in food, or on cooking utensils and preparatory surfaces in the context of **food production** and **relevant processing facilities**.

This product line is therefore aimed at food industry professionals for first-line rapid control tests.
